Milestone

Our Products

Normal Outer Bags

Chiga Light produces all types of outer plastic bags for various industrial applications which include garments and textiles, electronics, furniture, foods, stationery and sanitary products using quality raw materials, latest technology innovation and stringent quality control processes.

Auto Packing Films And Rolls

Chiga Light also produces auto-packing films and rolls in order to support the automated packing lines of our customers. By using the 3-layer extruder and up to 10 colours engraving printing machine, Chiga Light is able to produce HDPE, LDPE, LLDPE, and PP auto packing films for various industries.

Shrink Film

Manufactured from high-performance LDPE, shrink film is a cost effective packaging that complements carton and other paper packaging.

This high-performance bulk-packaging film provides excellent protection and stability to your goods during storage and transit. This film adapts to any job that comes its way.

It is used as industrial wrap to provide outer value-added protective wrapping for goods such as wooden planks, electronic goods in cartons and loose pallet loads. Also used for individual covering of CDs, software and smaller units on store shelves.

Shopping Bags

Chiga Light has been producing a wide range of both low and high-density shopping bags for retail outlets in the local markets.

Current range of products includes plain and printed HDPE / LDPE / LLDPE and PP vest carrier bags, HDPE / LDPE / LLDPE garbage bags and specially customized bags designed and manufactured according to customers' requirements.

Multi designs of shopping bags include soft loop, hard loop, patch handle, singlet bags and up to 10 colours engraving printing to support various packaging idea of shopping outlets.
